CARBON SEQUESTRATION PARTNERSHIP

A NEW ENERGY  
FUTURE FOR MONTANA,  
IDAHO, SOUTH DAKOTA,  
WYOMING, THE  
PACIFIC NORTHWEST  
AND THE NATION

# **The Big Sky Carbon Sequestration Partnership**

**Susan M. Capalbo**

**Director**

**and**

**Professor, Ag Econ and Econ**

**October 19, 2005**

**Bozeman, MT**

**SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY**

---

## Outline

- § Background on DOE Carbon Program and the Big Sky Partnership
- § Geological and Terrestrial Sequestration
- § Economic and Environmental Considerations

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# A Growing Case for Carbon Sequestration

- § GCCI goal to lower GHG intensity
  - 18% improvement by 2012
- § CO<sub>2</sub> Regulation at state, regional, National levels
  - Mandatory CO<sub>2</sub> requirements in MA, NH, OR
  - Other states and regions considering action
  - Recent legislation introduced by Sen. Hagel (3 bills, inc. S.388-voluntary) and Senator Byrd (S.745)
- § Renewed emphasis on U.S. coal
  - Electric power generation
  - Feedstock for hydrogen economy
  - FutureGen
- § Carbon Sequestration provides a means to achieve both energy security and environmental goals

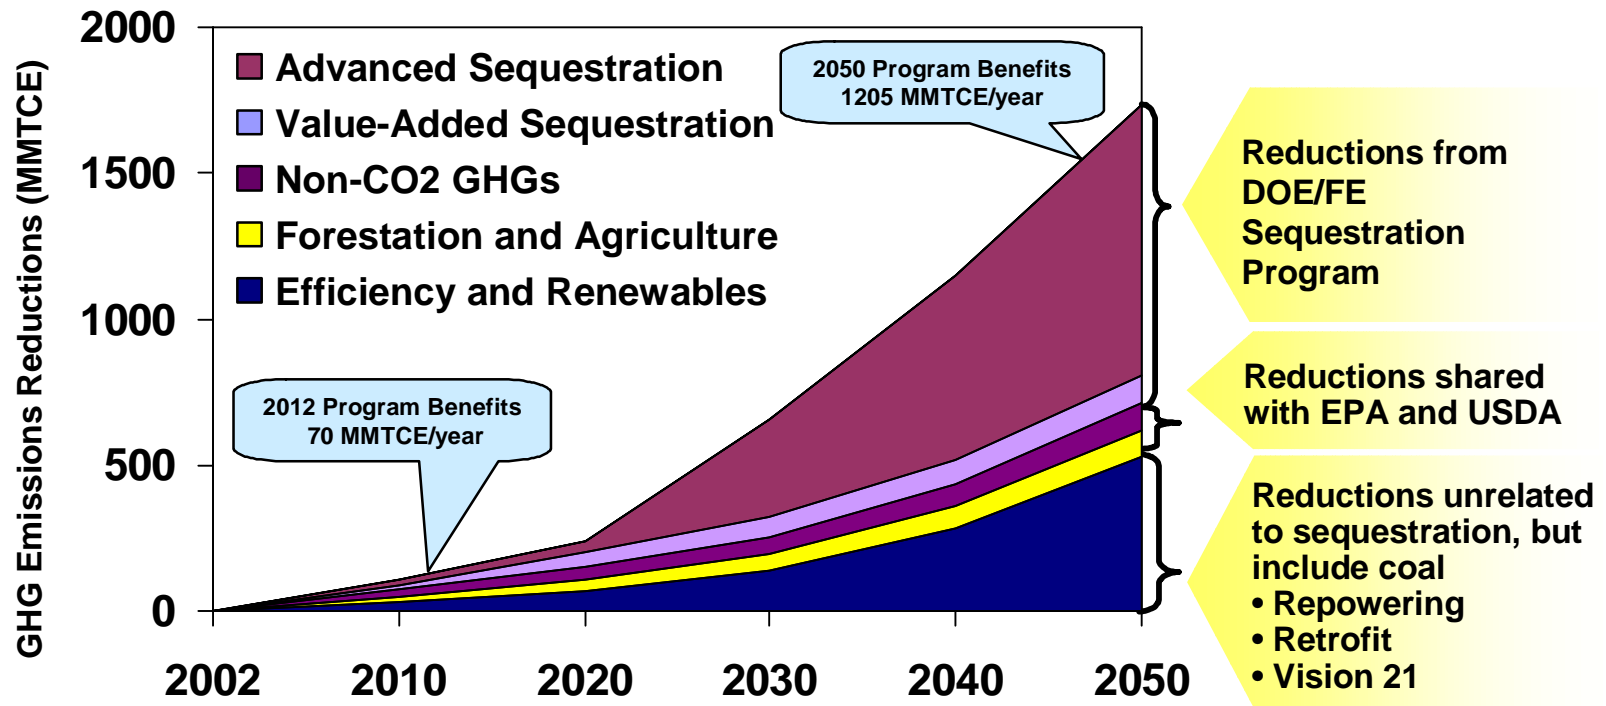

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Sequestration = Stabilization

## Could Account for >60% of Reduction Gap in 2050

SUSAN M. CAPALBO - DIRECTOR  
 MONTANA STATE UNIVERSITY

**BIG SKY**  
 CARBON SEQUESTRATION PARTNERSHIP

# What is Carbon Sequestration?

*Capture and storage of CO<sub>2</sub> and other Greenhouse Gases that would otherwise be emitted to the atmosphere*

## Capture can occur:

- at the point of emission
- when absorbed from air

## Storage locations include:

- underground reservoirs
- dissolved in deep oceans
- converted to solid material
- trees, grasses, soils, or algae

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

BIG SKY  
CARBON SEQUESTRATION PARTNERSHIP

---

# Successful Technologies to Sequester Carbon

Will need to:

- § Be effective and cost-competitive
- § Provide stable long-term storage
- § Be environmentally benign
- § Be acceptable to the public

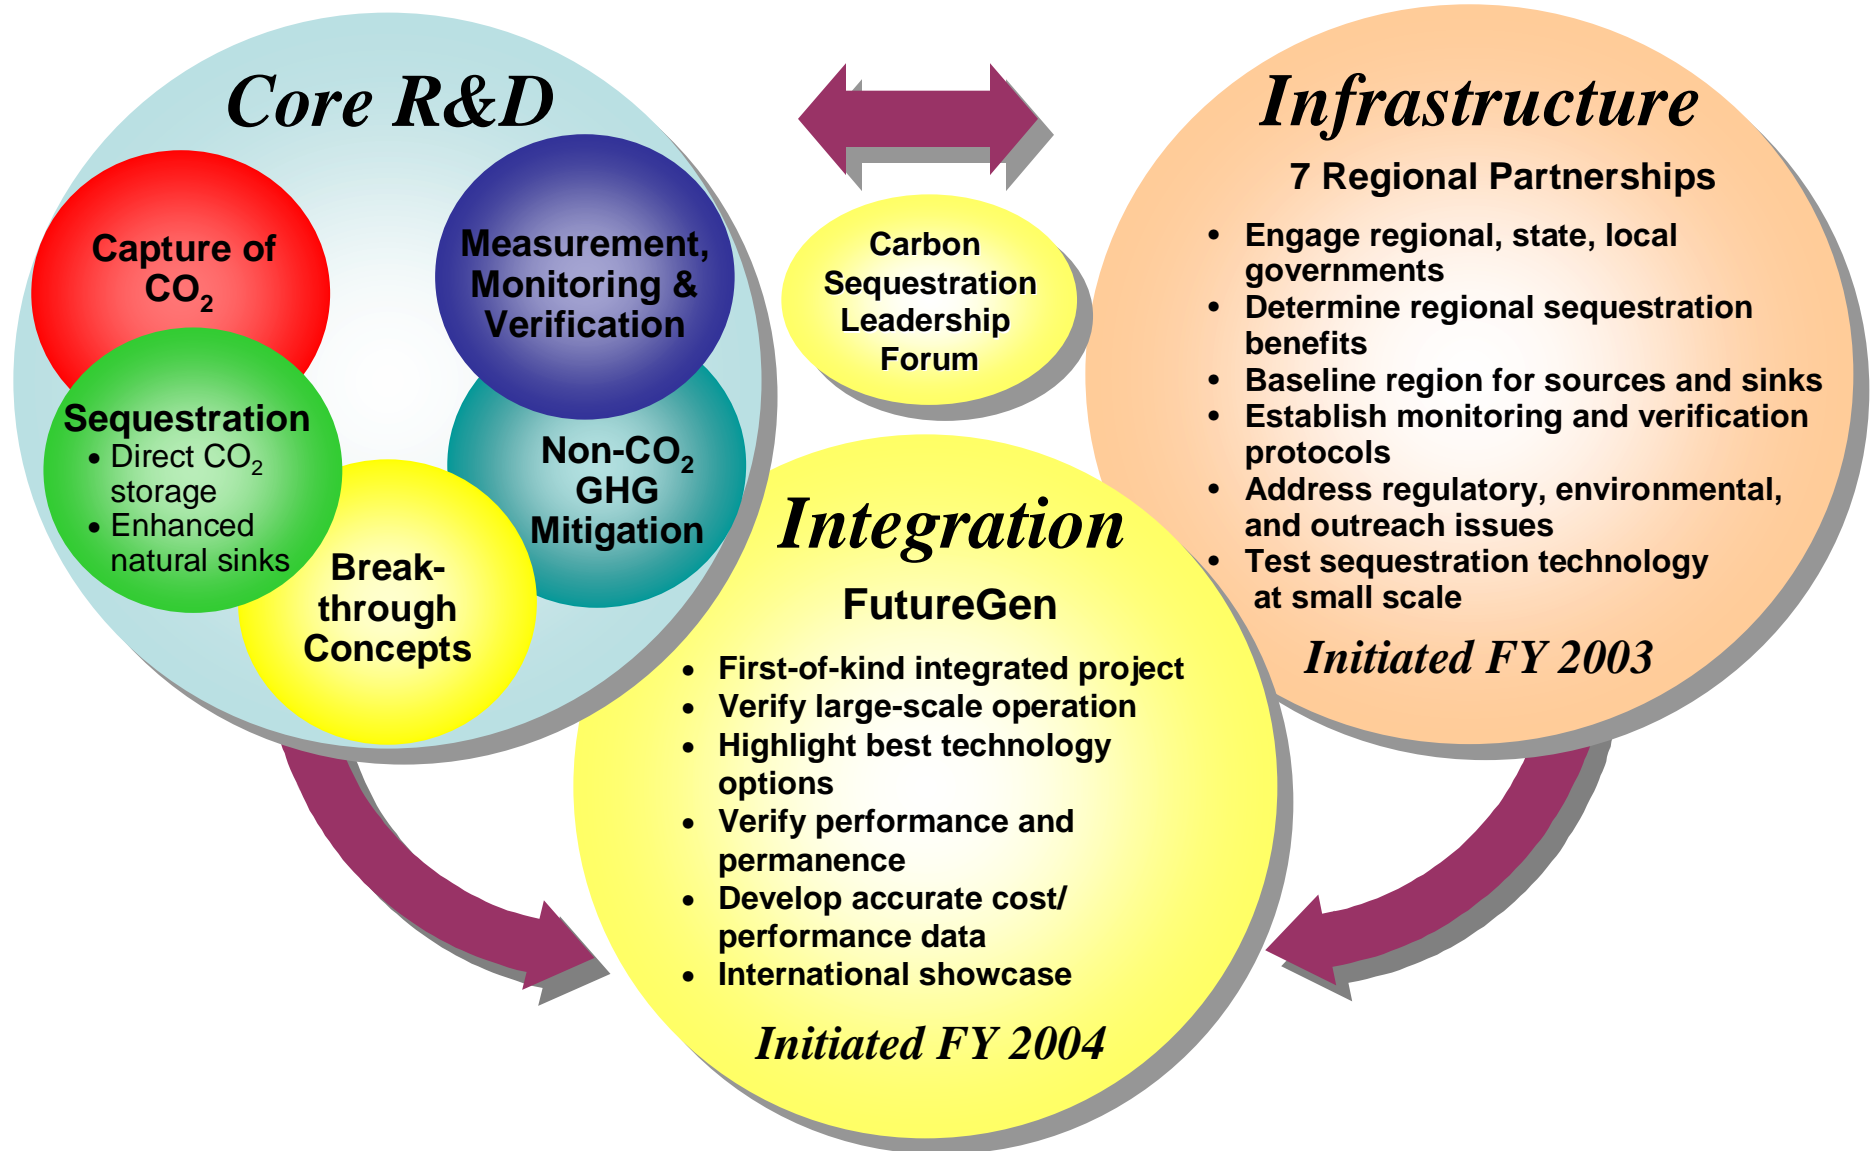

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Carbon Sequestration Program Structure

# Regional Carbon Sequestration Partnerships

*Developing Infrastructure for Wide-Scale Deployment*

- § Baseline region for sources and sinks
- § Address regulatory, environmental, outreach issues
- § Establish monitoring and verification protocols
  
- § Determine benefits of sequestration to region

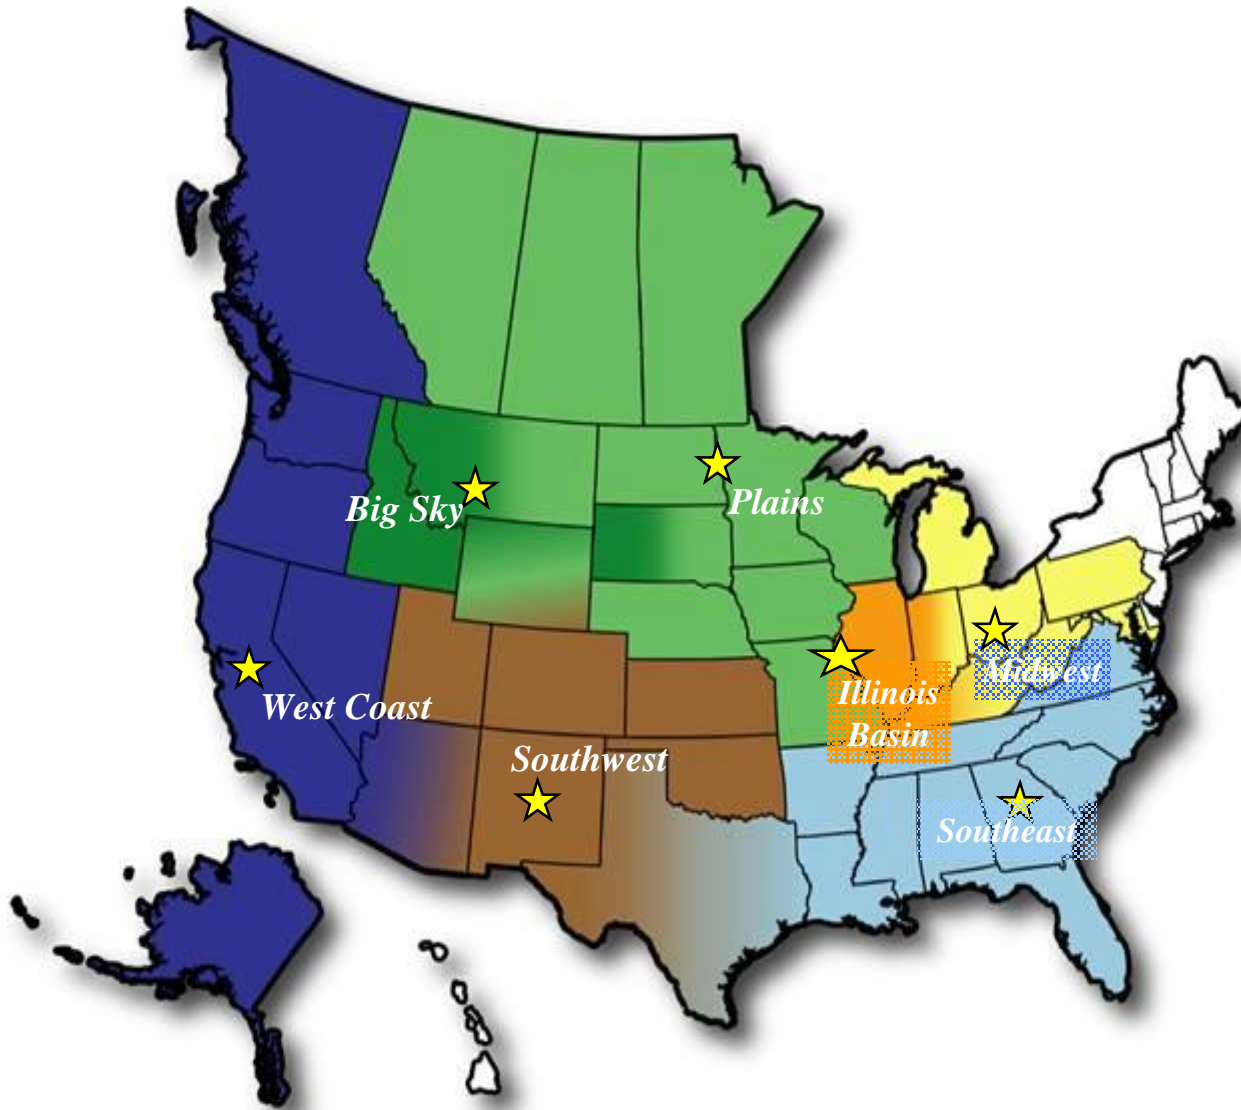

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# 7 Regional Carbon Sequestration Partnerships

# Overview of Big Sky Regional Partnership

[www.bigskyco2.org](http://www.bigskyco2.org)

- § Component of DOE's core program on CO<sub>2</sub> Capture and storage
- § Partnership Goal: Develop infrastructure to support and enable future carbon sequestration field tests and deployment (regional orientation)
- § Coalitions of professionals, and industry that represent regional interests and serve as driving force for carbon sequestration projects
- § Phase I: 2003-2005 scoping/screening effort
- § Phase II: Deployment of sequestration field validations and economic assessments of sequestration options

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# The Big Sky Partnership Region Contains Substantial Energy Resources

- § Nearly 40% of total U.S. **coal reserves** are in the Big Sky region
- § Huge water resources to support **hydroelectric power**
- § Many areas of high potential to support **wind power**
- § **Natural gas reserves** may also be tapped in the future
- § **Nuclear power** –part of the energy mix
- § Canadian **heavy oils, tar sands**

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

## Composition of Partnership

- § Research Institutions (universities, labs, others)
  - Including MSU, UI, UWYO, ISU, PNWD/PNNL, LANL, INL
- § State, federal agencies (includes USDA, USGS, NASA)
- § Industry members including major power producers  
(Energy Northwest, Sempra Generation, Portland  
General Electric, Puget Sound Energy)
- § Carbon trading entities (NCOC)
- § Outreach Education partners, including Governors' office in  
WY, MT, WA
- § Tribal Nations and Councils
- § International Collaborators (includes Canada, Norway, India)

SUSAN M. CAPALBO - DIRECTOR

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Phase I Experience

- § Identify, assess and catalogue **sources of CO2 emissions** and promising **geological** and **terrestrial** sinks
- § Develop an economic and risk assessment decision support framework to optimize region's C sequestration portfolio
- § Carbon trading program – market-based storage methods and verification protocols
- § Public education and outreach

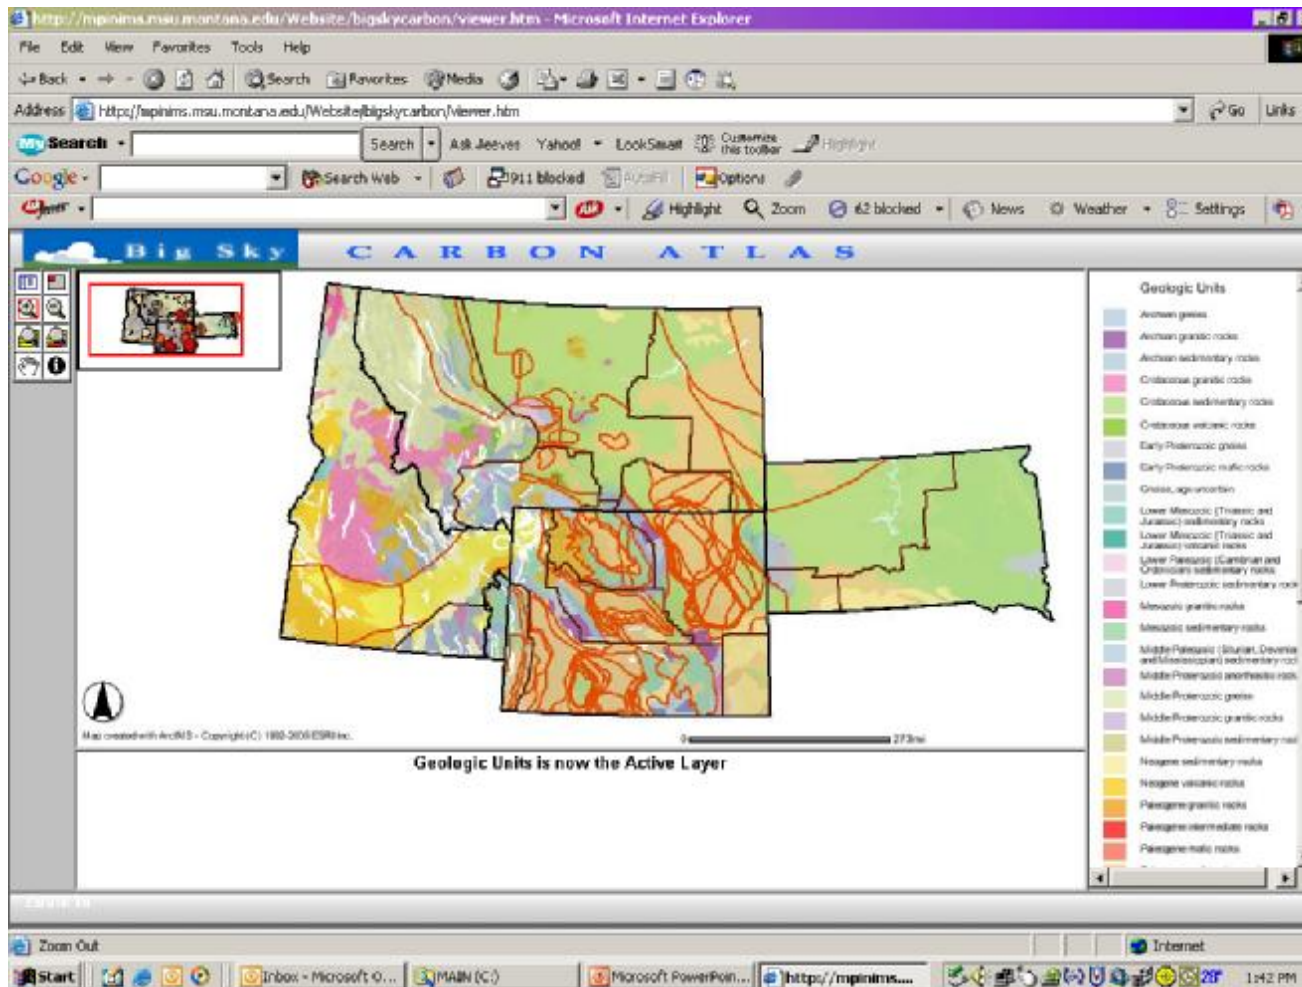

SUSAN M. CAPALBO - DIRECTOR

CARBON SEQUESTRATION PARTNERSHIP

---

## Phase II and Beyond

- § Utilize resource base to meet growing energy demand with portfolio of advanced technologies + sequestration opportunities
- § Work with industry partners so that field test are effective, relevant to commercial development needs, and transferable
- § Match storage capacity and storage integrity

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

The logo for the Big Sky Carbon Sequestration Partnership, featuring a stylized blue and white cloud graphic to the left of the text.

# Phase II and Beyond (continued)

## Geological Sequestration Efforts:

### § Demonstration projects

- basalt pilot scale injection (form solid phase carbonates)
- carbonate aquifer assessment (develop carbonate alkalinity)
- deep coal bed exchange (separate and sequester from flue gasses)

### § Transfer results to the Nation –

- national mafic/basalt rock atlas

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

BIG SKY  
CARBON SEQUESTRATION PARTNERSHIP

# CO<sub>2</sub> Sequestration in Basalts

## § Major flood basalt formations exist throughout the world

- Important role in global carbon cycle
- Implicated in past climate change events
- Not widely considered as a geological sequestration option

## § Build upon prior DOE investment in understanding basalt/aquifer systems that can be applied to carbon storage

## § Capacity and Retention

- Columbia River Basalt Group covers 164,000 km<sup>2</sup>, >174,000 km<sup>3</sup>
- Chemical makeup favorable for mineralization reactions
- Lateral connectivity of interflow zones but limited vertical connectivity between flows

## § Water Resource Implications

- Upper aquifers (<300 m) are major source of water
- Deeper aquifers contain non-potable water

---

# Columbia River Basin: Sequestration Example

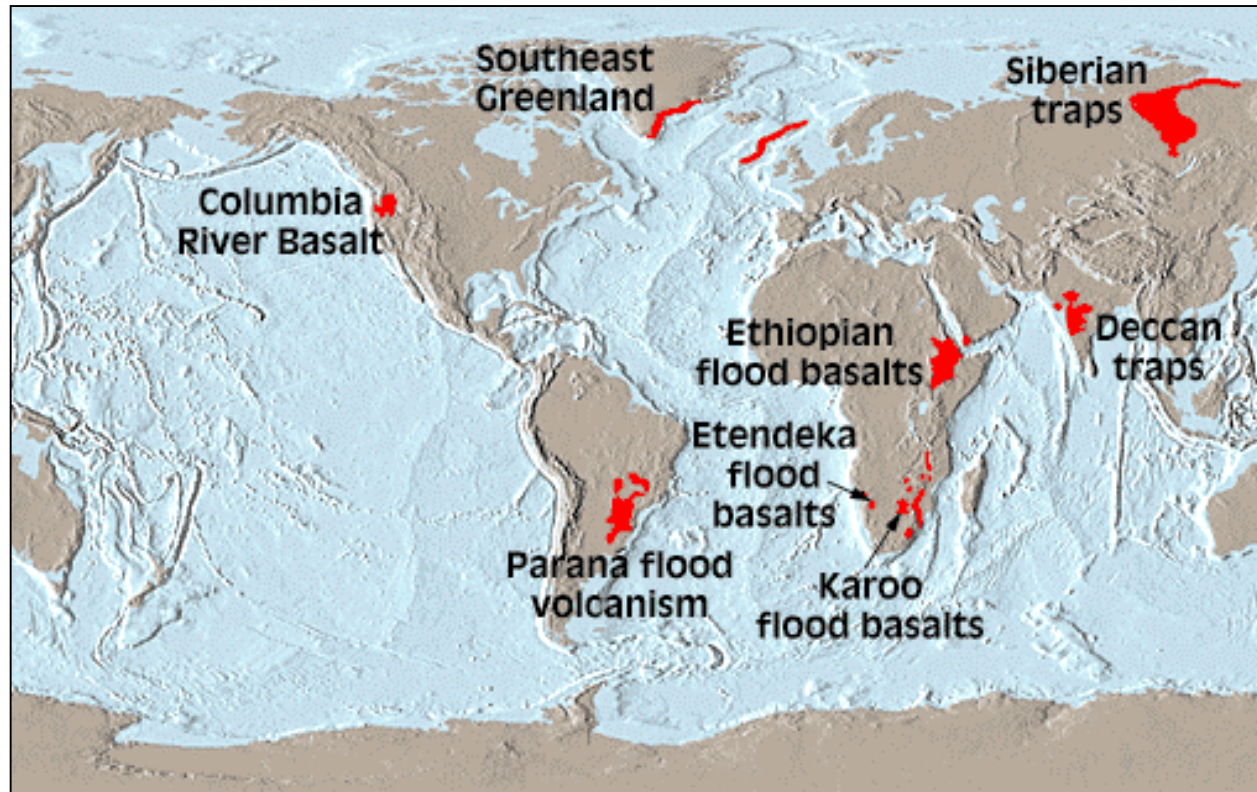

- § 164,000 km<sup>2</sup> of the Pacific Northwest
- § 15% porosity
- § 10 interflow zones
- § Hydrostatic pressure 100 atmospheres
- § Storage capacity of more than 100 Gt
- § 100 years of U.S. Carbon emissions

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Flood Basalts Cover More Than 1 Million km<sup>2</sup> of the Earth's Surface

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Conclusions

- § Large basalts providences globally distributed
- § No significant economic opportunity costs of injection
- § Conducive mineralogy for sequestration
- § Rapid conversion of CO<sub>2</sub> to carbonate
- § High porosity and permeability
- § Five largest basalt provinces could sequester 10,000 years of world CO<sub>2</sub>
- § Big question: how does this compare to costs of other sequestration options and other mitigation options – topic for another presentation!

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

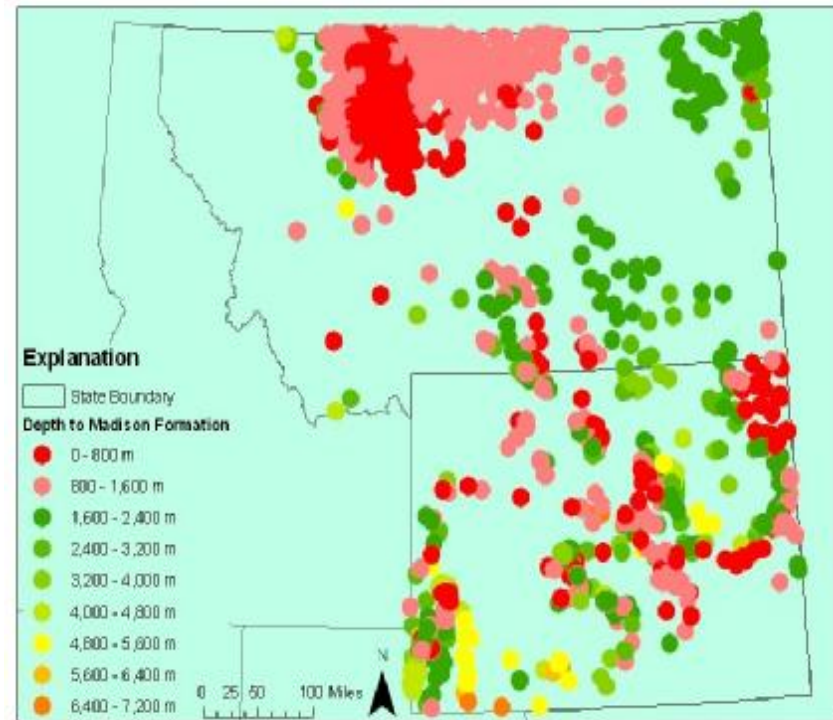

# Carbonate Petroleum Reservoir Pilot

§ Regionally abundant carbonate rocks (dolomites and limestones) are highly reactive with CO<sub>2</sub>

§ Reactions should result in permeability and porosity increases

Depth to Top of Madison Formation

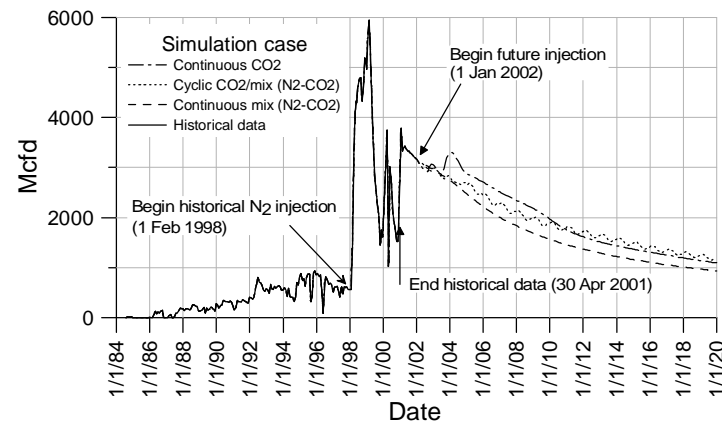

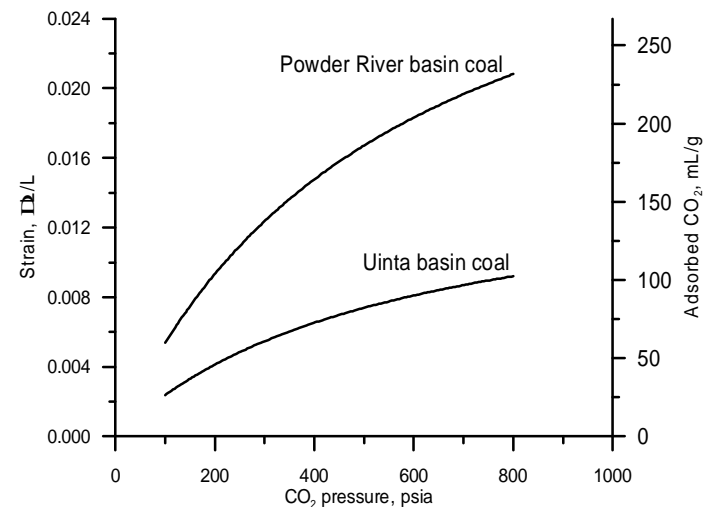

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

BIG SKY  
CARBON SEQUESTRATION PARTNERSHIP

# Enhanced Coal Bed Sequestration

- § Recent work shows Powder River basin coals can adsorb twice as much CO<sub>2</sub> as Uinta basin coals
- § Study various gas injection strategies
  - Economic evaluation
  - Reservoir simulation
- § Attention will be given to impact of coal swelling on permeability changes

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

BIG SKY  
CARBON SEQUESTRATION PARTNERSHIP

---

## **Phase II and Beyond (continued)**

### **Terrestrial Sequestration Efforts:**

- § Advance Phase I market-based storage and verification protocols -- NCOC**
- § Cropland, forestland and rangeland field test sites and carbon portfolios in conjunction with industry, tribal members, and landowners**

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Terrestrial Pilot Projects

## § Forestry

## § South Dakota web-based enrollment

- Private lands (Big Sky)

## § Wyoming Rangeland (U of Wyoming)

- Tribal lands (Big Sky + national)

## § North Central Montana Cropland

- Year 4, remote sensing, MIMV
- Best management practices
- No till cropland, CRP, rangeland
- Coal, oil & natural gas (in exist)
- Goal: soil & water conservation range management studies.
- Sampling costs and information gains from spatial-temporal sampling designs

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# North Central Montana Cropland

Soil C sequestration influenced by:

1. Tillage and no-till management
2. Cropping intensity
3. Pulse crops in rotation

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

# Integration Activities: Economic Analysis

- § Economic potential for geologic and terrestrial sequestration
- § Quantify regional carbon supply curves
- § Potential for large
  - scale deployment

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

## Why Is This Important?

- § Critical to addressing the feasibility of scaling up of the sequestration activities
- § Useful for addressing long term financial viability of power plants under carbon-constrained scenarios
- § Used to address tradeoffs among alternative sequestration options

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP

---

# Integration Activities: Public Outreach and Education

- § Build public acceptance and support
- § Ensure field validation permitting requirements are met
- § Pursue practical coalition building
- § Highlight results

SUSAN M. CAPALBO - DIRECTOR  
MONTANA STATE UNIVERSITY

**BIG SKY**  
CARBON SEQUESTRATION PARTNERSHIP
